## **Corporate Profile**

1 October 2024

# Introduction to Kim Loong Resources Berhad (“KLR”) Group

KIM LOONG  
RESOURCES BERHAD

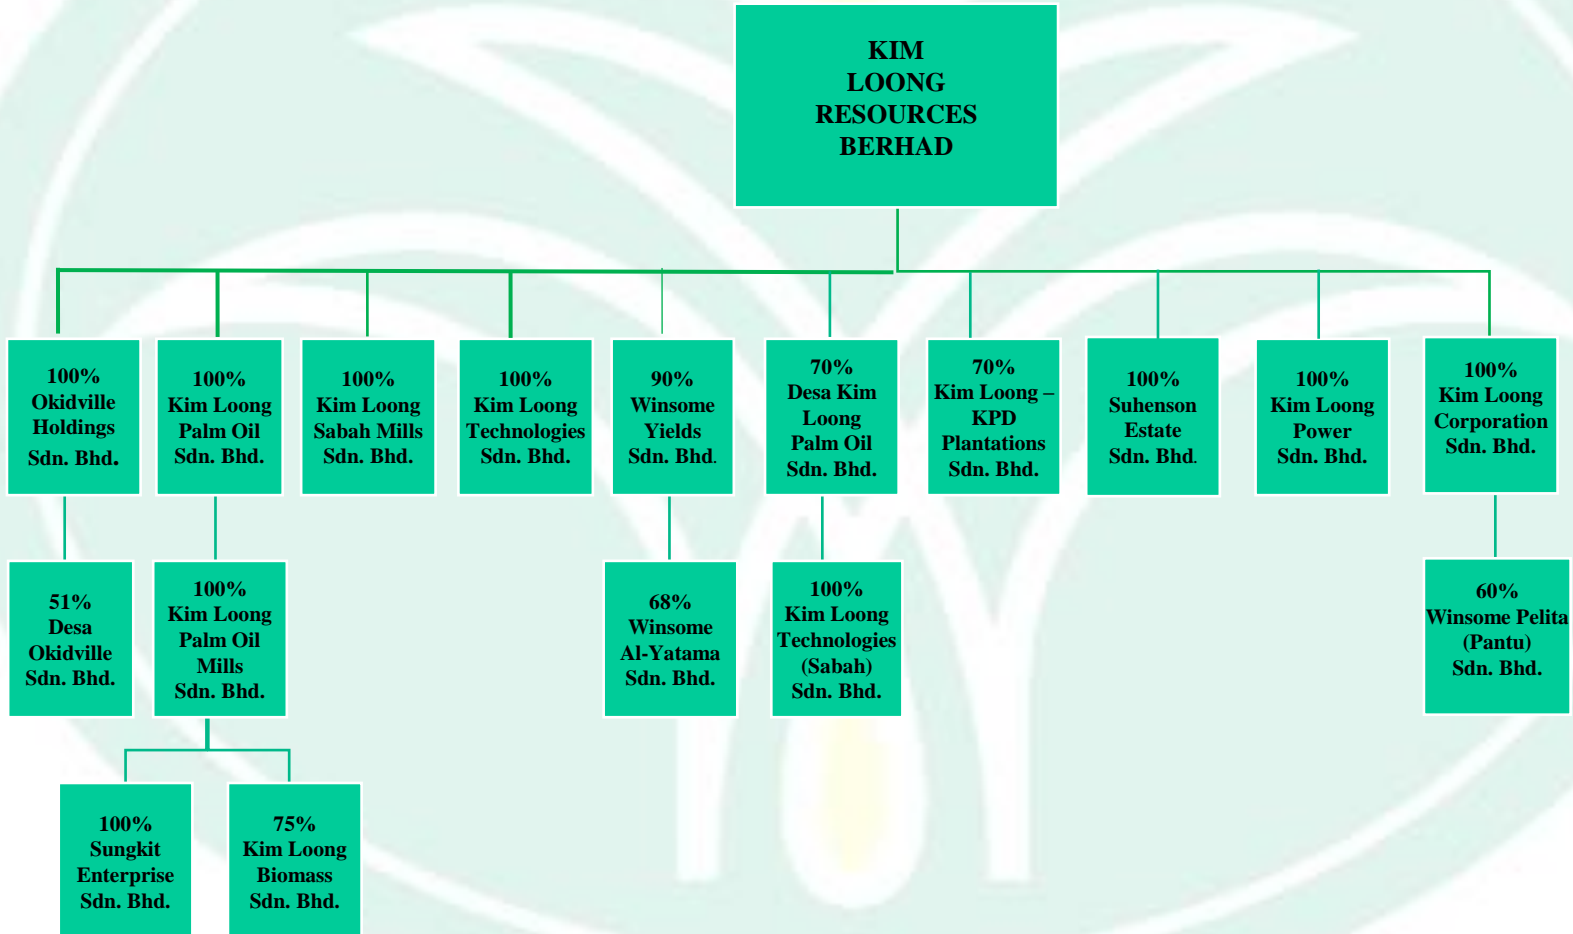

- KLR’s holding company, Sharikat Kim Loong Sendirian Berhad, had its beginning back in 1967 with a 1,000 acres rubber plantation in Ulu Tiram, Johor
- KLR is listed on the Main Market of Bursa Malaysia Securities Berhad since year 2000 and currently with a RM2.33 billion market capitalisation
- KLR is primarily involved in oil palm cultivation and related businesses which include the following:
  - About 17,000 Ha of oil palm plantations in Sabah, Sarawak and Johor
  - 3 palm oil mills located in Johor and Sabah with a total processing capacity of 250MT of FFB per hour

# Plantation Operations :

## LOCATION OF OPERATIONS

KIM LOONG  
RESOURCES BERHAD

# AGE PROFILE OF PALMS (AS AT 31 JULY 2024)

Total planted area: 15,684 hectares

# PRODUCTION

## FINANCIAL YEAR

	2024 (MT)	2Q24 (MT)	2Q25 (MT)	Q to Q % change
<b>FFB</b>	329,597	155,838	159,211	2.2%
<b>CPO</b>	317,607	148,507	157,032	5.7%
<b>PK</b>	77,197	35,985	38,212	6.2%

# FFB PRODUCTION & PROJECTION

The projected FFB production for FY2025 is 345,000MT. (about 5% higher than FY2024).

Note : Projection of production is based on existing land bank.

# FFB YIELD PER HECTARE

1. Lower yield in 2020 was partly due to lower yield from young mature palms and deferment of peak crop cycle into following financial year.

Note:  
The statistics for Malaysia National FFB yield is extracted from MPOB web-site based on calendar year 2019 to 2023 whilst the figures from KLR group are based on its financial year (Feb – Jan).

# OIL YIELD PER HECTARE

Note :  
\*The statistics for Malaysia National CPO yield are extracted from MPOB web-site based on calendar year 2019 to 2023 whilst the figures from KLR group are based on its financial year (Feb – Jan).

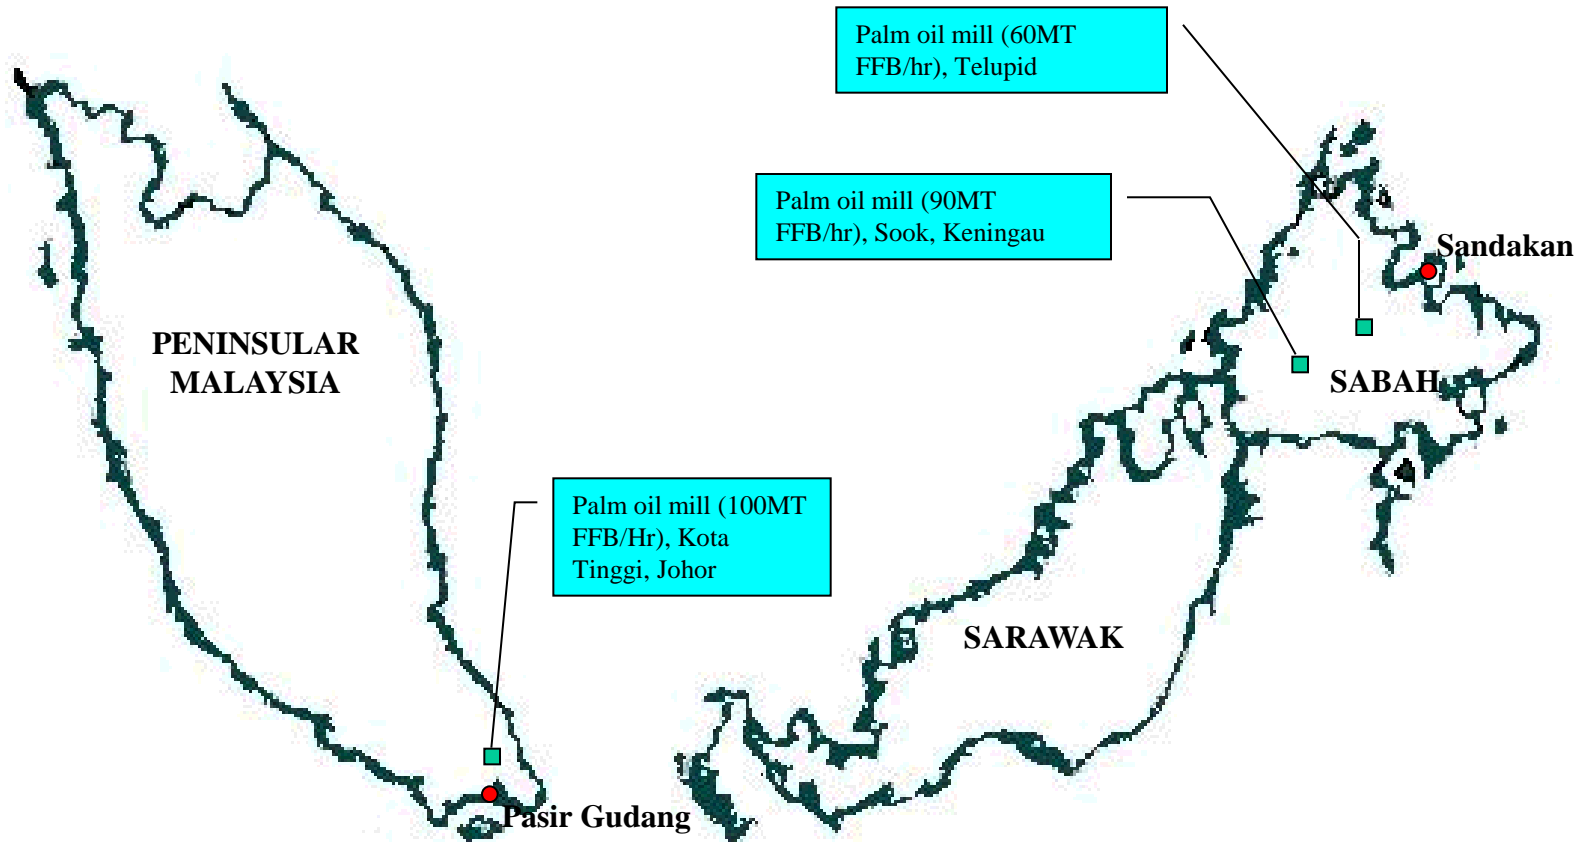

# Palm Oil Milling:

## MILLING LOCATION

KIM LOONG

# CPO OER COMPARISON

Note :

\*The statistics for Malaysia National CPO extraction rates are extracted from MPOB web-site based on calendar year 2019 - 2023 whilst the figures from KLR Group are based on its financial year (Feb – Jan).

# ACHIEVEMENTS

## 2024

- KLRB was awarded by the Edge as the highest return to shareholders over 3 years in Malaysia under plantation sector.

## 2023

- Following year 2022, KLRB has again been recognised by Forbes Asia together with the other Eight Malaysian companies as part of its coverage of Best Under A Billion 2023, which highlights 200 Asia-Pacific companies with less than US\$1 billion in revenue and consistent top-line and bottom-line growth.
- All the 3 palm oil mills and 2 palm fiber oil solvent extraction plants under the Group passed the International Sustainability and Carbon Certification ("ISCC") audit and obtained ISCC certification (refer following page).
- In December 2023, biogas plant at Telupid Mill commenced supplying power up to 1.5 MW to grid.

## 2022

- KLRB is one of the Seven Malaysian Companies selected by Forbes as Asia's Best under A Billion 2022 list.
- In December 2022, biogas plant at Keningau Mill commenced supplying power up to 2.0 MW to grid.

# Environmental, Sustainability and Governance (ESG)

## Environmental

- Zero burning in land clearing
- Soil enrichment and conservation program
- Riparian reserves
- Reduction of greenhouse gas emission
- Waste and effluent management

## Sustainability

- Human and workers rights
- Health and safety
- Freedom of association and collective bargaining
- Improving the quality of life
- Diversity and inclusion
- Contribution to society

## Governance

- Anti-bribery and anti-corruption policy
- Transparency
- Shareholder rights

# Green Practices

## Mill

- We have implemented three methane capture facilities for the renewable power generation projects at our three mills which reduce greenhouse gas emissions as well as reduce the reliance on diesel power generators during start-up or low crop period.  
\* For latest progress, please refer to Near Term Prospect under Mill (power projects).
- Our effluent treatment systems allow capturing of greenhouse gas to minimise greenhouse gas emission to the atmosphere and are adequately designed to meet the mandated discharge parameters.
- Based on readings of our three mills for 6 months up to July 2024, the amount of GHG (Methane) captured, which were then destroyed or repurposed to generate renewable energy for sales as well as to reduce our dependence on diesel power generator, was 16.8 million m<sup>3</sup> (FY2024: 34.2 million m<sup>3</sup>).

## Plantation

- The Group adheres strictly to the policy of zero burning in both new plantings and replanting of oil palm. Zero burning keeps the air smoke-free. The debris remnants, comprising bushes or small trees which have been felled, are shredded and spread in the field to biodegrade. This releases nutrients and adds valuable organic matter to the soil, reducing the usage of chemical fertilisers during the immature period.
- Planting of leguminous cover crop in new planting and replanted areas. The fast-growing plants provide cover to protect the soil and build up nutrients in the topsoil as well as to suppress weeds.
- Solid organic waste material generated from the milling operations such as decanter cake and empty fruit bunches (“EFB”) are applied in fields, especially at marginal soil areas. Scheduled wastes are disposed of properly.

# Dividend Policy

## Target Dividend Payout Ratio

- » We do not have a formal dividend policy but we are committed to pay-out at least 30% of profit.
- » Our pay-out rate in the past 5 years are as follows:

# BUSINESS OUTLOOK AND STRATEGIES

# Near Term Prospect

KIM LOONG  
RESOURCES BERHAD

## Plantation

- » The Group's FFB production for FY2025 is targeted to achieve 5% higher than FY2024 on account of more replanted areas coming into maturity and a better palm age profile with higher percentage of the Group's productive area under young palms.
- » CPO price movement has been volatile and unpredictable. However, the Management expects the average CPO prices for FY2025 to stay around RM4,000 per MT.
- » The Management targets to replant about 1,000 hectares in FY2025.

# Near Term Prospect (continued)

KIM LOONG  
RESOURCES BERHAD

## Mill

- » Despite stiff competition from surrounding mills, we target to achieve a total mill processing throughput of 1.6 million MT of FFB for FY2025.
- » Estimated sales revenue for excess palm kernel shells to third parties is about RM26 million from our three mills in FY2025.
- » Palm fiber oil solvent extraction plants (“PFOE”) in our Kota Tinggi and Keningau mills are running satisfactorily, contributing revenue and profit for the Group.

# Near Term Prospect (continued)

KIM LOONG  
RESOURCES BERHAD

## Mill

### Power projects implementation in:

- » Mill at Kota Tinggi, Johor
  - 3 units of 500 kilowatts gas engine for internal use.
  - Successfully obtained approval for net export capacity of 1.8 megawatt from Sustainable Energy Development Authority (“SEDA”) Malaysia in April 2015 and Renewable Energy Power Purchase Agreement (“REPPA”) has been signed with Tenaga Nasional Berhad (“TNB”).
  - Installation of 2 units of 1.2 megawatts gas engine for supplying electricity to TNB grid was completed and commenced operation in June 2019. Replacement of 1 unit of 1.2 megawatts gas engine took place in September 2024.
  - For 8 months up to September 2024 in FY2025, revenue of RM3.3 million has been generated from supplying power to TNB grid. On average, annual revenue of about RM5 million is expected from FY2025 onwards.

# Near Term Prospect (continued)

## Mill (continued)

### Power projects implementation in: (continued)

- » Mill at Keningau, Sabah
  - 2 units of 500 kilowatts gas engine for internal use.
  - Successfully obtained approval for net export capacity of 2.0 megawatt from SEDA Malaysia in December 2016 and REPPA has been signed with Sabah Electricity Sdn. Bhd. (“SESB”).
  - Installation of 2 units of 1.2 megawatts gas engine for supply to SESB grid commenced in September 2019 and completed in February 2022. Our biogas plant has commenced supply of power to grid since December 2022.
  - For 8 months up to September 2024 in FY2025, revenue of RM4.2 million has been generated from supplying power to SESB grid. We expect this plant could contribute up to RM7 million revenue in FY2025.
  
- » Mill at Telupid, Sabah
  - 2 units of 500 kilowatts gas engine for internal use.
  - Successfully obtained approval for net export capacity of 1.5 megawatt from SEDA Malaysia in September 2019 and REPPA has been signed with SESB.
  - Biogas plant with 2 units of 0.9 megawatts gas engine has commenced supply of power to grid since December 2023, and we expect this plant can contribute positively to revenue as well as profit from the FY2025 onwards.

# KLR Group's Future Plan

KIM LOONG  
RESOURCES BERHAD

KLR's future plans are as follows:

- ❖ To source for additional plantation land in Sabah and Sarawak. However, compliance with MSPO restrictions and ESG policies are major constraints.
- ❖ To source for suitable land and apply for license to set up a palm oil mill in Sarawak.
- ❖ To continue replanting of older palms to ensure continued growth in future FFB production.
- ❖ To improve mechanisation of plantations systems.
